

JOY MWERU GITAU

mweruwagitau@gmail.com | (254) 0792811198 | [Linked In](#) | [Github](#) | KENYA

I am a data professional with a strong foundation in Business Technology, Data Science and Analytics, focused on turning information into insights that support better decisions. I combine analytical skills with a background in graphic and web design, enabling me to present data in clear and engaging ways. Alongside this, I have valuable experience in project coordination, administrative support and working with stakeholders to keep work organized and moving smoothly. I am committed to learning, teamwork, and contributing to meaningful solutions that help organizations grow and perform better.

SKILLS

Data Analysis & Machine Learning: Python & libraries, model building, Advanced Excel

Data Querying & Management: SQL, database extraction, data cleaning

Data Visualization & Reporting: Power BI, Tableau, M365 Suite

Web & Graphic Design: WordPress, Squarespace, Adobe Suite, Canva, Figma

Project Coordination & Support: Workflow tracking, documentation, stakeholder communication, Collaboration tools (Slack, Trello, Teams)

PROJECTS

[Analysis of Marketing data \(Github repository linked here\)](#)

Personal project analyzing a Portuguese bank's telemarketing campaign data to identify patterns and build predictive models to improve the effectiveness of future direct marketing efforts.

Tools & Techniques: Python, scikit-learn, Pandas, NumPy, Seaborn, Machine learning

[AgrisenseAI Project \(Github repository linked here\)](#)

Group project leveraging deep learning and data analytics to provide real-time market recommendations and price forecasts for maize, tomatoes, and avocados in Kenya. **Tools & Techniques:** Python, TensorFlow, Keras, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Tableau, Streamlit, FastAPI, PowerPoint, Canva

[Syriatel Customer Churn Analysis \(GitHub repository linked here\)](#)

Project analyzing customer churn for Syriatel to identify early indicators of service discontinuation and build a predictive model. **Tools & Techniques:** Python, Pandas, NumPy, Scikit-learn, Data visualization, Predictive modeling

WORK EXPERIENCE

Data Analyst - The Kenya Revenue Authority (KRA) {Feb 2025 - Feb 2026 Contract | Onsite}

Analyzed tax and compliance data to uncover trends, risks, and strategic insights.
Built predictive models and dashboards to drive revenue assurance and operational efficiency.
Partnered with cross-functional teams to implement analytics solutions and enhance data quality.

Key Achievements:

Piloted a Compliance Management Tool (CMT) in the Compliance Department, enhancing monitoring and engagement of high-risk taxpayers.
Delivered a Stocks Management use case for Customs, improving visibility and accuracy in inventory and cargo tracking.

Web Developer & Production Assistant - The KaBrazen Consortium

{2022- 2024 as a consultant | Hybrid}

Led a team to revise and enhance an existing website by gathering user specifications and functional requirements.
Designed and built the website using Squarespace, ensuring it met user needs and organizational goals.
Supported smooth production through project planning, progress monitoring, and uploading content to Podbean and the website.

Key Achievement:

Delivered a website that achieved high stakeholder and user satisfaction by aligning design with usability and organizational objectives.

ICT Officer - ICT Authority(PDTP) Deployed at HELB {2022 - 2023 | Onsite}

Partnered with the Business Intelligence team to obtain, clean, and analyze staff and customer data, creating reports and dashboards in Power BI and spreadsheets for monitoring and decision-making.
Maintained and updated the HELB website using WordPress to ensure optimal functionality and user experience.
Responded to customer queries through the CRM system by analyzing client accounts and providing accurate, data-backed resolutions.

Key Achievement:

Automated the customer satisfaction feedback process by shifting from manual forms to online submissions, improving data collection efficiency and analysis.

ICT Intern - Ministry of Labour and Social Security Kenya {March - May 2022 | Onsite}

Provided ICT and end-user technical support for PC hardware, peripherals, mobile devices,

and network connectivity, ensuring minimal downtime and uninterrupted user operations.

Key Achievement:

Initiated the setup of an internal help desk system to streamline ticket logging, issue tracking, and response management.

EDUCATION

Data Science Bootcamp

Moringa School *{July 2024 - to July 2025}*

Bachelor of Business in Information Technology

KCA University *{May 2018 - December 2022}*

RELEVANT CERTIFICATIONS

AI Essentials for Software Developers by Moringa School

PRINCE2® Foundation Certification in Project Management

CISCO NetAcad Certifications: Networking Essentials, PCAP – Programming in Python, NDG Linux Unhatched, Cybersecurity Essentials

Data Protection Act & Data Privacy Certification – Capabuil

VOLUNTEER EXPERIENCE

Education Mentor – EmpServe Kenya *(Aug 2025 – Present)*

Mentoring educators/teachers and supporting them as they start, run & facilitate Code Clubs in their respective Learning Institutions.

Data Entry – Ministry of Sports Events Nairobi *{July 2021- September 2021}*

Handled athlete data capture and management for the Africa Deaflympics Ballgames Qualifiers and the World Athletics U20 Championships Nairobi21. Uploaded records to event management and medical systems, ensured accurate accreditation data, and maintained both digital and physical filing systems for smooth event operations.

Karura community chapel *{January 2019- March 2019}*

Wrote requisitions at the end of each month and input data using Microsoft word and Microsoft

excel worksheets.

Offered support in the development process of the Church management system and church application where I helped manage the graphical user interface and suggest improvements that may be made for efficiency and use by the user.
